PROJECTS

1. **Project Name: Bikroy Bazar** - [Live Link](#) , [GitHub_Client_Link](#) , [Github_serverLink](#)

Add Features:

Technology used: HTML , CSS (tailwind) , JavaScript , React (react query, day piker, react form hook etc.) , Firebase (authentication, authorization) , JWT , Node JS(Express JS) , Mongo DB Database , Font Awesome , Font Icons etc.

- This website is mainly created to sell old mobiles. The first home page has a number, slider, about section, category section (dynamic), footer section.
- Clicking on a product in the category section shows all its related products. Its user can book the product and make payment.
- A route called a dashboard is created immediately. The dashboard has been created in three categories. (1) Buyers (2) Sellers (3) Admin. They are made to do a different work.

2. **Project Name: Yummy-Kitchen** - [LiveLink](#) , [GitHubClientLink](#) , [GithubServerLink](#)

Add Features:

Technology used: HTML, CSS (tailwind), JavaScript, React, Firebase (authentication, authorization), JWT, Node JS (Express JS), Mongo DB Database , Font Awesome , Font Icons etc.

- Created a navbar. I have created a route called blog. Created review added system.
- Login, Register, I used authentication, authorization. Private Route Implement.
- You can see the details of different products. I have done the work of added service.

3. **Project Name: Learn with Platform-** [LiveLink](#) , [GitHubClientLink](#) , [GithubServerLink](#)

Add Features:

Technology used: HTML, CSS (tailwind), JavaScript, React, Firebase (authentication, authorization), JWT, Node JS(Express JS), Mongo DB Database , Font Awesome , Font Icons etc.

- Logging, registrar implemented, I used a private route, Implemented dynamic courses.
- Worked on downloading the course. JWT used. I have created a route called FAQ & Blog
- Drack Mode, Light Mode Implement. Realistic Footer sections.
